A 2
cont materials, with the proviso that any portion of the bag in direct contact with said pharmaceutical preparation of liquid oxaliplatinum does not contain polyvinylchloride-based plastic material.

11. (New) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to claim 10, wherein said bag has a multi-layer structure comprising an outer envelope and one or more internal layers.

12. (New) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to claim 10, wherein the liquid solution of oxaliplatinum is in contact with an internal layer of said bag, said internal layer being constructed from a polypropylene material.

13. (New) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to claim 10, wherein the concentration of oxaliplatinum in the pharmaceutical preparation is between 1 and 8 mg/ml.

14. (New) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to claim 10, wherein the concentration of oxaliplatinum in the pharmaceutical preparation is between 1 and 5 mg/ml.

15. (New) Flexible impervious bag for medical use containing a pharmaceutical preparation of oxaliplatinum according to claim 11, wherein said flexible bag consists of two welded sheets of multi-layer sheet material comprising as its outer envelope one film of polyamide of 11-amino-undecanoic acid bonded by at least one of its surfaces to a film of polypropylene by means of a film of polyolefine, the polypropylene film forming the internal layer of the flexible bag.
